Schedule 1: Services

Phishing is the most prevalent cyber threat that the department faces and is often the first stage of more sophisticated cyber-attacks, allowing attackers to gain authorised users' credentials or as a means for attackers to deliver malicious software onto the Department's IT assets. Furthermore, phishing is often used as a precursor to ransomware attacks, which the NCSC has designated as the most severe cyber threat facing the UK.

The impact of a successful attack could include data loss, both citizen and government (including classified data), extortion and fraud, system downtime and outages, reputational damage, and the associated costs with each of these.

Consequently, Visionist has agreed to deliver 12 months' Ethical Phishing Managed Service for the Department of Business, Energy and Industrial Strategy.

To ensure that the Department and its staff are not vulnerable to phishing threats and scams, and therefore ensure that the department is able to meet its wider objectives. The project will deliver:

- ■■■ bespoke ethical smishing lures
- Management reporting
