hSo Colocation Service Level Agreement

Introduction

This Service Level Agreement (SLA) sets out the HighSpeed Office Limited (hSo) Service commitments for the hSo: Colocation service (Service) to you the hSo customer (Customer). All words and phrases that appear in this document have their ordinary meanings unless they are defined otherwise here or in our Terms and Conditions.

Service Commitments

Service availability

Infrastructure Availability for hSo: Colocation means that critical infrastructure, including power and Heating, Ventilating and Air-Conditioning (HVAC) is available in your rack. hSo: Colocation is committed to having a 100% Infrastructure Availability.

Critical infrastructure includes all power and HVAC including UPS, PDUs and cabling. It does not include power supplies on customer equipment or PDUs supplied by the customer.

Availability is expressed as a percentage and calculated for each hSo service as the total number of hours over a quarter during which the Service was available out of the total number of hours in a quarter:

Total number of hours over a quarter — Number of hours of unavailability

Total number of hours in a quarter

Unavailability commences from the time stated on the trouble ticket and includes each whole hour until the Service is restored.

Planned outages do not count as unavailability, but wherever possible such outages will be conducted outside hSo working hours. Except in emergencies, Customers will be given seven days' notice of any such planned outages. In emergencies, hSo shall give as much notice as is reasonably practicable in all the circumstances.

Credit Calculation

Where we do not meet Service Availability targets in any given quarter, we will apply a credit equivalent to one day's rental per hour of downtime for that service. The maximum reduction applied per quarter will be capped at ten hours of Outage, equivalent to 10 days' rental.

Network Availability

Network availability is critical for the success in connecting to the hSo: vDC service and the Customer's success in using it. This SLA does not cover the customer side of the demarcation point (i.e. customer LAN, internal wiring or other equipment at customer address). In addition, this SLA does not cover network downtime.

In the event of network downtime, the customer must work with their network provider before registering a fault with hSo. To provide an SLA cover for both Network and Voice availability, hSo recommends using the hSo:MPLS Network for delivering the connection to the hSo: vDC service. In that case, the relevant hSo SLA will cover the network fault.

Incident Management and Escalations

Incident Categories

Incident Type	Description
Service Affecting	Fault - Customer's Service is down
Service Change - Major	Major change - 24/7
Service Change - Minor	Minor change request - same day (10am-6pm)
Non-Service Affecting	Non-Service-affecting works to minimise future Service impact
Technical Query	Query about the technical setup of a Service
Complaint	Customer complaint
Billing Enquiry	Any billing queries
Abuse	Report abuse and abusive internet users / companies
Planned Works	Scheduled Maintenance on the Customer or hSo network
Emergency Planned Works	Short-notice Service-affecting work prevent future Service impact
Admin Enquiry	Administrative or audit work
Order Enquiry	New Service order

Incident Priorities

Incident Type	Description
	Urgent - Critical impact to the Customer's business operations. If a Customer Service(s) or site or sites are down, then a P1 category is assigned.
Priority 1 (P1)	hSo and the Customer will commit full-time resources "around the clock" to resolve the situation.
Priority 2 (P2)	High - Operation of an existing Service or site is severely degraded, or significant aspects of the Customer's business operation are negatively impacted by inadequate performance of hSo supported products. hSo and the Customer will commit full-time resources "around the clock" to resolve the situation.
Priority 3 (P3)	Medium - Operation of an existing Service is not operational for individual user e.g. phone hSo and the Customer will commit to resources during contracted hours to provide assistance to resolve the situation.

Low - Operation of an existing Service is degraded for individual with minimal impact to the rest of the

Priority 4 (P4)

hSo and the Customer will commit to resources during contracted hours to provide assistance to resolve the situation.

Priority 5 (P5)

Non-Service Affecting – Operation of an existing service is down causing no impact to the rest of the business eg Backup link Escalation Procedure Type Customer

Incident Response

The Customer should report a fault within two days of experiencing the fault. At the time of notification by you of a fault, the hSo Customer Service Representative will request the following details from you:

Symptoms of the problem;

Details of any tests carried out by you;

• Confirmation of the name and telephone details of the person reporting the fault together with the primary contact person, and alternative contact arrangements (such as email addresses and/or mobile phone numbers); and (if outside working hours) information about access to the building.

When notifying hSo over the telephone, the time will then be agreed with you and a trouble ticket opened. Measurement of incident resolution time will commence at the time the Customer or hSo raises a fault ticket and will end when hSo confirms to the Customer that the incident has been resolved. This trouble ticket will remain open until the problem is resolved. hSo's Customer Service Centre is available 24 hours per day, and we commit to responding to faults within 60 minutes of the time the trouble ticket is opened.

Incident Resolution

hSo is committed to resolving incidents within a Maximum Incident Resolution Time. Resolution times are determined by the priority level of the incident. Resolution time excludes Customer parked time. Parked time is defined by hSo as being unable to progress resolution without further contact with the Customer. Parked time will be excluded from the total fault time.

Incident Priority	Max Incident Resolution Time
P1/P2	Thurs -
P3	End of next working day
P4	to working days
P5	Girtime commitment

Escalation Procedure

hSo employs automated escalation to ensure that unresolved Incidents are promptly addressed. Escalation is done according to Incident Priority and time elapsed since it was raised.

Priority		Customer Services Manager	Engineering Director	Managing Director
P1	Urgent	Immediate	+ hours	+ hours
P2 ·	High	+• hours	+hours	
P3	Medium	+ hours	+ hours	
P4	Low	+ hours	+ hours	
P5	Non	+ hours		

Credit Calculation

Where we do not meet Incident Resolution targets in any given quarter, we will apply a credit equivalent to one day's rental per incident unresolved on time. The maximum reduction applied per quarter will be capped at five incidents, equivalent to five days' rental.

Service Credits

The hSo:Colocation service will be available to Customer according to the Service commitments detailed above. If hSo fails to meet the above Service commitments in a given quarter, Customer shall be entitled to make a claim for the SLA credit detailed above no later than the one month after the right to claim a credit occurred (i.e. the fault). hSo's data shall be used to determine whether you are entitled to a service credit or not. This compensation is your sole and exclusive remedy and our only liability for any failure to provide the Service in accordance with this SLA or at all.

Any compensation that may arise under this SLA for all the service commitments together will be paid as a credit to your next bill for this Service up to a maximum of 10 day's recurring charges (rental) (excluding variable usage charges) payable in respect of the hSo:Colocation service charge for that quarter. This credit will be applied to your next quarter's invoice. We are not liable to pay compensation if we are prevented (in whole or part) from meeting the targets contained in this SLA or your hSo agreement through your actions or inactions, those of a third party acting on your behalf, or for any other reason outside our reasonable control. This includes unavailability due to the failure of one of hSo's Service Providers or due to the failure of your equipment.

Note that where hSo does not meet any Service commitments due to the failure of another hSo service that you are purchasing, you are only able to claim compensation in respect of the first failed service.

Customer Service

hSo's customer focus is perhaps best demonstrated by the existence of a single point of contact for all your enquiries and Service-related matters. Our Customer Service Team is ready to assist you 24 hours a day, 365 days per year.

hSo Access Service Level Agreement

Introduction

This Service Level Agreement (SLA) sets out the HighSpeed Office Limited (hSo) Service commitments for the hSo:Access service (Service) to you the hSo customer (Customer). All words and phrases that appear in this document have their ordinary meanings unless they are defined otherwise here or in our Terms and Conditions.

Our Service commitments apply to network services using our UK Access service. Broadband (hSo:DSL) services and non-UK network services are excluded and not covered under this SLA.

Service Commitments

Service availability

Availability for the hSo:Access service means you are able to send and receive IP packets from the hSo core network to hSo global peering partners outside of the core network. Subject to the terms of your hSo agreement and this SLA, the hSo:Access service is committed to having Availability of: (i) 99.99% for single connections and (ii) 100% for a service connecting to the hSo Core network using a resilient solution.

Availability is expressed as a percentage and calculated for each hSo service as the total number of hours over a quarter during which the Service was available out of the total number of hours in a quarter:

Total number of hours over a quarter – Number of hours of unavailability Total number of hours in a quarter

Unavailability commences from the time stated on the trouble ticket and includes each whole hour until the Service is restored.

Planned outages do not count as unavailability, but wherever possible such outages will be conducted outside hSo working hours. Except in emergencies, Customers will be given seven days' notice of any such planned outages. In emergencies, hSo shall give as much notice as is reasonably practicable in all the circumstances.

Credit Calculation

Where we do not meet Service Availability targets in any given quarter, we will apply a credit equivalent to one day's rental per hour of downtime for that site. The maximum reduction applied per quarter will be capped at ten hours of Outage, equivalent to 10 days' rental.

Network Latency

hSo:Access is committed to have an average round trip time within Europe of 50ms or less and from UK to Eastern North America of 100ms or less.

The hSo:Access Latency commitment does not include customer premise equipment or Customer's Local Area Network (LAN). Network Latency is measured between hSo backbone hubs and hSo global peering partners' backbone hubs. Incident Management and Escalations
