Schedule 7: UK GDPR Information

This schedule reproduces the annexes to the UK GDPR schedule contained within the Framework Agreement and incorporated into this Call-off Contract and clause and schedule references are to those in the Framework Agreement but references to CCS have been amended

Annex 1 - Processing Personal Data

This Annex shall be completed by the Controller, who may take account of the view of the Processors, however the final decision as to the content of this Annex shall be with the Buyer at its absolute discretion.

1.1.1.1 The contact details of the Buyer's Data Protection Officer are: [REDACTED]

1.1.1.2 The contact details of the Supplier's Data Protection Officer are: [REDACTED]

1.1.1.3 The Processor shall comply with any further written instructions with respect to Processing by the Controller.

1.1.1.4 Any such further instructions shall be incorporated into this Annex.

Description	Details
Identity of Controller and Processor for each Category of Personal Data	The Buyer is Controller and the Supplier is Processor The Parties acknowledge that in accordance with paragraphs 2 to paragraph 15 of Schedule 7 and for the purposes of the Data Protection Legislation, the Buyer is the Controller and the Supplier is the Processor of the following Personal Data: Ronin is a tool that creates infrastructure in AWS that will be used by the researchers in a secure fashion. UKRI will be providing data that will be placed in a storage system in AWS called S3. Ronin will secure that data through the security controls it puts in place for that data based on specific project requirements ie project 1 will see data set 1 only but project 2 may have access to data set 1 and data set 2. In order for that data to be used by the researchers Ronin will provide compute resource to them ie a laptop that has the tools they have requested and the option to run another computer for their AI LLMs which will access the data they have been allowed access to. In order to use Ronin they will need to login via credentials that UKRI will provide
Duration of the Processing	<i>The Project is expected to last for 1 year in line with the contract.</i>

Nature and purposes of the Processing	The UKRI Data Lab has been setup to allow projects to propose cutting-edge analysis of UKRI funding data and will rely on access to sensitive, unpublished information, such as details of unfunded applications to UKRI. UKRI wishes to explore the feasibility of providing a secure analytical environment for approved researchers external to UKRI to conduct approved research on selected UKRI datasets without any of this data being transferred outside of this environment. This is primarily to reduce the risk of inadvertent disclosure, but also to provide a pattern that could be repeated for other analytical projects involving researchers external to UKRI. As UK government agencies increasingly embrace data science and AI for policy and research, the need for scalable, secure, and compliant compute environments has become critical. UKRI are proposing a new, off-platform UKRI Data Lab precisely because it allows innovation to flourish without placing undue risk on the integrity, security, or compliance position of UKRI DataBank and other 'source of truth' repositories within the internal UKRI environment. Ronin Interacts with AWS Services such as compute (ie laptop equivalents) for research tools to be used by the project teams as well as AI Services such as LLMs in a secure fashion. It does not directly process any PII data beyond the users logging in and giving them access to data related to their compute usage.
Type of Personal Data	<i>Full name (first and last), email address, employer, password to log in</i> <i>Ronin provides an audit capability through its access to AWS Services such as CloudWatch, Cloud Trail and Security Hub and will be kept for the duration of the project.</i>
Categories of Data Subject	<i>All users of the Ronin Service. This will initially relate to metascience researchers who are outside of UKRI. This service will likely be extended to external researchers from other areas, members of DSIT staff, and some UKRI staff members.</i>
International transfers and legal gateway	<i>All data will be stored in the UK London Region with any backups stored in Ireland to meet UKRI BCP Requirements.</i>
Plan for return and destruction of the data once the Processing is complete	<i>The users, and their information, will be removed from Ronin once they have left the project or the project is finished. The users will be removed from AWS through deletion of their accounts and information will be removed in line with the UKRI retention policy.</i>
