Annex A to Schedule 2 to Contract DSTL0000044199 – Statement of Requirement

Title

Purchase of CNA (Cyanoacrylate / Superglue) fingerprint fuming chambers.

Summary

Purchase of twelve (12) CNA fingerprint fuming chambers to replace aging, soon to be unsupported, Foster + Freeman fingerprint chambers. The units to be replaced are: Seven (7) x MVC3000 and Five (5) x MVC1000

Background

CNA fuming is a chemical process that involves exposing items to cyanoacrylate vapour at high humidity within a specialist superglue fuming cabinet. It is effective at visualising latent marks on non-porous, semi-porous and adhesive surfaces. Cyanoacrylate vapour polymerises on some latent fingermarks to produce a white deposit. This polymerisation can be initiated by water and some other latent fingermark constituents

The DSTL, Forensics and Biometrics (FAB) Team currently has twelve Foster + Freeman CNA fingerprint fuming chambers (seven MVC3000 units and five MVC1000 units) in use in their Porton Down laboratories. These chambers are approaching the end of their supported life (manufacturer support will end 31st December 2024) and will require staggered replacement over the period to 31st March 2025

Requirement

The replacement of existing CNA cabinets shall be on a like-for-like, or better, basis – with four MVC3000 units and 3 MVC1000 units being replaced with same or equivalent cabinets which shall meet or exceed the following mandatory requirements:

- Operate to CAST / Fingerprint Visualisation Manual parameters with proof of validation to these parameters.
- Have both automatic, pre-programmed process cycles and user-definable process cycles.
- Be able to use all commercially available cyanoacrylate fuming products.
- Have user serviceable activated carbon-based filtration systems.
- Have suitable end user protection mechanisms (e.g. process operated door interlocks).
- Be constructed in a manner that allows for easy and effective user cleaning with no “dirt-trap” areas.
- Have anti-corrosion construction materials to allow for cleaning using water, RBS T105 and Azo wipes / ethanol.

Desirable

- Have systems of UV decontamination / sterilization (if supplied as optional addition, systems are to be included in the tender submission).

The risk posed by a lack of spare parts being available for the remaining cabinets during the December 2024 – March 2025 (should any of these cabinets malfunction) must be mitigated by DSTL by retention of cabinets replaced and using them for spares / cannibalisation (to be supported by the new supplier) – all replaced cabinets must be removed and disposed of, by the Contractor **once all twelve cabinets have been replaced in March 2025.**

The replacement timeframes (to include installation, in-situ calibration and Contractor led user familiarisation / training) shall not exceed 5 days during each of the replacement events (March 2025).

The replacement cabinets shall include a minimum of two years full manufacturer’s warranty from the time of installation and a 3yr service and calibration contract, 1x visit per year commencing twelve months after installation and acceptance.

OFFICIAL

The Contractor shall have a qualified UK based service / repair engineer on-site within ninety six (96) hours of the fault being reported – the Contractor's service desk must be contactable during normal UK business hours and must respond within 24 hours of initial contact

Repairs

Should a fault occur with the new replacement cabinets within the two year warranty period (and subsequent service contract periods), the Contract shall provide a qualified UK based service / repair engineer on-site within ninety six (96) hours of the fault being reported – the Contractor's service desk shall be contactable during normal UK business hours and must respond within 24 hours of initial contact. Where a cabinet cannot be repaired during the initial site visit the Contractor shall repair or replace the unit within five (5) working days of site visit. The Contractor shall have a UK based parts / equipment storage / distribution centre to guarantee the aforementioned service criteria (i.e. not be subject to unforeseen, future international supply / shipping delays or restrictions).
