

Joint Schedule 2 (Variation Form)

This form is to be used in order to change a contract in accordance with Clause 24 (Changing the contract):

Contract Details	
This variation is between:	UK Research and Innovation (UKRI) (" the Buyer ") And Networthnet Limited T/A Worth Internet Systems (" the Supplier ")
Contract name:	Simpler & Better Funding (SBF): Delivering The Funding Service (TFS) through Public Beta and in to Live (" the Contract ")
Contract reference number:	DDaT23179
Statement of Work (SOW) reference:	Milestone 3: Award a high-volume opportunity with a reduction in administrative effort required by both councils and research office users.
Buyer reference:	Mission 2: Responsive mode opportunities can run on the service
Details of Proposed Variation	
Variation initiated by:	Buyer
Variation number:	001
Date variation is raised:	Tuesday 1 st August 2023
Proposed variation	As per Annex 1 below
Reason for the variation:	More is now known about what is needed before the end of November. This includes: <ul style="list-style-type: none">• The Beta Assessment being pushed back.• More known about scale of Opportunity & Award demand due through TFS in Q3.• More known about integration points with other Major Programmes within UKRI.
An Impact Assessment shall be provided within:	Not applicable
Impact of Variation	
Likely impact of the proposed variation:	None
Outcome of Variation	
Contract variation:	This Contract detailed above is varied as follows:

Contract Ref: DDaT23179

Framework Ref: RM1043.8 Digital Outcomes 6

Project Version: v2.0

Model Version: v3.8

	Replace existing SOW 1 with the updated SOW 1 contained within Annex 1 below.	
Financial variation:	Original SOW Value:	£2,028,500.00 excluding VAT
	Additional cost due to variation:	£821,120.00 excluding VAT
	New SOW value:	£2,849,620.00 excluding VAT
Timescale variation/s:	Not applicable	

- 1 This Variation must be agreed and signed by both Parties to the Contract and shall only be effective from the date it is signed by the Buyer.
- 2 Words and expressions in this Variation shall have the meanings given to them in the Contract.
- 3 The Contract, including any previous Variations, shall remain effective and unaltered except as amended by this Variation.

Annex 1

The first part of the paper discusses the importance of the research and the objectives of the study. It then moves on to a literature review, which provides a background on the topic and identifies the gaps in the existing research. The methodology section describes the research design, data collection, and analysis. The results section presents the findings of the study, and the conclusion summarizes the main points and offers suggestions for future research.

The research was conducted in a systematic and rigorous manner, following the principles of good research practice. The data were collected from a representative sample of the population, and the analysis was carried out using appropriate statistical methods. The results of the study are presented in a clear and concise manner, and the conclusions are based on the evidence gathered.

The study has several strengths, including a large sample size, a well-defined research design, and the use of appropriate statistical methods. However, there are also some limitations, such as the cross-sectional nature of the data and the potential for self-report bias. Despite these limitations, the study provides valuable insights into the topic and contributes to the existing knowledge.

The findings of the study have important implications for practice and policy. They suggest that there is a need for further research in this area, and that the results can be used to inform decision-making. The study also highlights the importance of considering the context of the research and the needs of the community.

In conclusion, the study provides a comprehensive overview of the topic and offers valuable insights into the research. It is a well-written and informative paper that is worth reading for anyone interested in the field.

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The second part of the paper describes the methodology used in the study, including the data collection and analysis techniques. The third part of the paper presents the results of the study, and the fourth part discusses the conclusions and implications of the findings.

The study was conducted using a quantitative research design. Data was collected from a sample of 100 participants using a survey questionnaire. The data was then analyzed using statistical software to identify patterns and relationships between the variables.

The results of the study show that there is a significant positive correlation between the variables. This suggests that as one variable increases, the other variable also tends to increase. The findings have important implications for the field of study and may lead to further research in this area.

In conclusion, the study has provided valuable insights into the relationship between the variables. The findings suggest that there is a strong positive correlation, which has implications for both theory and practice. Further research is needed to explore this relationship in more detail.

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The methodology section describes the research design and the data collection process. The results section presents the findings of the study, and the conclusion section summarizes the main findings and provides recommendations for future research.

The study was conducted in a laboratory setting. The participants were recruited from a local university and were assigned to two groups: the experimental group and the control group. The experimental group received the intervention, while the control group did not. The data was collected over a period of six weeks.

The results of the study show that the intervention had a significant positive effect on the outcome variable. The experimental group showed a significant improvement in the outcome variable compared to the control group. The findings suggest that the intervention is effective in improving the outcome variable.

The conclusion of the study is that the intervention is effective in improving the outcome variable. The findings suggest that the intervention is a promising approach for improving the outcome variable. Further research is needed to confirm the findings and to explore the long-term effects of the intervention.

The first part of the paper discusses the importance of the research and the objectives of the study. It highlights the need for a comprehensive understanding of the subject matter and the role of the researcher in this process. The second part of the paper presents the methodology used in the study, including the selection of participants, the data collection methods, and the analysis techniques. The third part of the paper discusses the results of the study and the conclusions drawn from the data. The final part of the paper provides a summary of the findings and discusses the implications for future research.

The research was conducted in a systematic and rigorous manner, following the principles of scientific inquiry. The data collected was analyzed using statistical methods to ensure the validity and reliability of the findings. The results of the study indicate that there is a significant relationship between the variables studied, and this relationship is consistent across the different groups of participants.

The findings of this study have important implications for the field of research. They provide a new perspective on the subject matter and suggest areas for further investigation. The results also have practical implications for the application of the research findings in the real world.

In conclusion, this study has provided valuable insights into the subject matter and has contributed to the body of knowledge in the field. The findings suggest that there is a need for further research in this area, and the results of this study can be used to inform future research and practice.
