Call-Off Schedule 20 (Call-Off Specification)

This Schedule sets out the characteristics of the Deliverables that the Supplier will be required to make to the Buyers under this Call-Off Contract

1. Introduction

International collaboration is crucial to tackling the world's challenges and UKRI / NERC works in partnership with academia globally.

UKRI has launched the Trusted Research and Innovation (TR&I) work programme to further support and help protect all those working in our thriving and collaborative international research and innovation sector by ensuring they have the tools and information needed to safeguard against potential theft and exploitation, including because of hostile activity by state and other actors.

Trusted Research is not intended to hinder collaboration – it ensures that collaboration is conducted in a way which is mindful of potential risks from hostile states or groups which don't share the same ethical values as the UK.

In August 2021 UKRI set out its Trusted Research Principles. To ensure those principles are followed and implemented in the council, NERC undertook a recruitment exercise for a Trusted Research Programme Manager (once internally and then externally). The recruitment exercises failed to attract a suitable candidate.

One of the key elements of the role, had it been filled, would have been completion of a risk-mapping exercise. Consequently, the risk-mapping exercise still needs to be completed but NERC does not currently have the capacity to undertake it within its resources.

NERC is therefore looking to buy-in the services to undertake and complete the risk-mapping exercise by 31 March 2022. This is essential to meet the emerging Trusted Research requirements from BEIS.

Should the risk-mapping exercise not be completed there is a risk that NERC will fail to identify and mitigate key risks in relation to Trusted Research, and not comply with UKRI's principles and expectations. It will also be unable to effectively manage the expectations of our stakeholders.

2. Aims & Objectives

The principle aims of this exercise to understand key Trusted Research risks in relation to NERC grants, partnerships, and infrastructure to enable effective risk management.

The reason for the tender exercise is the failure to recruit and lack of internal resource as described above.

The objective is to buy-in the necessary services to complete the risk-mapping exercise, as follows:

- Work in conjunction with NERC's subject matter experts to identify potential risks arising from **existing grant collaborations** and recommend appropriate and proportionate mitigating actions.

- Work in conjunction with NERC's subject matter experts to identify potential risks arising from existing **research partnerships**, including those of NERC's centres and recommend appropriate and proportionate mitigating actions.
- Work in conjunction with NERC's subject matter experts to identify potential risks arising from **current data sets** maintained by NERC which may be sensitive/ of interest to hostile states and may require additional data access controls e.g., rainforest cover data which could be used to support illegal logging and seabed data which could infer locations of mineral resources. Recommend appropriate and proportionate mitigating actions.
- Work in conjunction with NERC's subject matter experts to identify NERC **infrastructure** which may be of specific interest to hostile states and partners and review associated controls.

Review our **key policies** and make recommendations to ensure alignment with UKRI Trusted Research Principles.

3. Aims & Objectives

Expected outputs for grants/partnerships/ infrastructure and data management areas are detailed below:

- Review current data sets (including those at Centres) and compare to risk sources/threat reports
- Undertake interviews to inform understanding of existing controls.
- Identify and summarise those at specific risk from hostile states
- Review control measures in relation to management for the specific at-risk items
- Suggest additional controls

Expected outputs for the policy review are detailed below:

- Summarise key policies with have a Trusted Research interface
- Explain key limitations and benefits
- Suggest amendments to ensure alignment with the Trusted Research Principles

Formally present key headline findings and summarise in a summary report

4. Background to the Requirement

This requirement is in response to the increased public interest in the security of UK research and innovation IP, BEIS requirements on UKRI and the UKRI Trusted Research principles (see link above). This activity ensures NERC continues to operate as a responsible business.

The activity will be overseen by the NERC Senior Risk Specialist with input from the NERC Head of Sustainability. This service provider will be required to report progress against deliverables to these two named roles during the project.

Service delivery can be remote with the use of video conference to deliver interviews and updates.

5. Scope

Provider will need to familiarise themselves with Trusted Research expectations and need act in accordance with NERC and URKI data management policies.
They will also need to agree to a standard non-disclosure agreement to facilitate the sharing and use of sensitive data.
United Kingdom Security Vetting unit (UKSV) basic security clearance is desirable/required for this work.

- Work in conjunction with NERC's subject matter experts to identify potential risks arising from **current data sets** maintained by NERC which may be sensitive/ of interest to hostile states and may require additional data access controls e.g., reinforcement cover data which could be used to support illegal logging and seabed data which could infer locations of mineral resources. Recommend appropriate and proportionate mitigating actions.
- Work in conjunction with NERC's subject matter experts to identify NERC **infrastructure** which may be of specific interest to hostile states and partners and review associated controls.
