- A3-2-11 any event occurs, or proceeding is taken, with respect to the Supplier in any jurisdiction to which it is subject that has an effect equivalent or similar to any of the events mentioned in clause A3-2-3 to clause A3-2-10 inclusive; or

- A3-5-3 cease use of and return (or, at the Contracting Authority's or UK SBS's acting as an agent on behalf of the Contracting Authority's election, destroy)

all of the Contracting Authority's Materials in the Supplier's possession or control; and

A3-5-4 Cease all use of, and delete all copies of, UK SBS's or the Contracting Authority's or UK SBS's confidential information.

A3-6 Termination

The Contracting Authority or UK SBS acting as an agent on behalf of the Contracting Authority may terminate the Contract by written notice to the Supplier in any of the following circumstances:

A3-6-1 Where it considers that the Contract has been subject to a substantial modification which would have required a new procurement procedure in accordance with Regulation 72(9) of the Public Contracts Regulations 2015 ("PCR 2015");

A3-6-2 Where it considers that the Supplier has at the time of the award of the Contract been in one of the situations referred to in Regulation 57(1) of the PCR 2015, including as a result of the application of regulation 57(2), and should therefore have been excluded from the procurement procedure;

A3-6-3 Where the Contract should not have been awarded to the Supplier in view of a serious infringement of the obligations under the EU Treaties and Directive 2014/24/EU of the European Parliament and of the Council that has been declared by the Court of Justice of the European Union in a procedure under Article 258 of the TFEU;

A3-6-4 Where the European Commission sends a reasoned opinion to the United Kingdom or brings the matter before the Court of Justice of the European Union under Article 258 of the TFEU alleging that the Contract should not have been awarded to the Supplier in view of a serious infringement of the obligations under the Treaties and Directive 2014/24/EU of the European Parliament and of the Council; or

A3-6-5 Where a third party starts court proceedings against the Contracting Authority seeking a declaration that the Contract is ineffective or should be shortened under Regulations 98 to 101 of the PCR 2015, which the Contracting Authority or UK SBS acting as an agent on behalf of the Contracting Authority considers to have a reasonable prospect of success.

A3-6-6 Such termination shall be effective immediately or at such later date as is specified in the notice. The Contracting Authority shall not incur any liability to the Supplier by reason of such termination and shall not be required to pay any costs, losses or damage to the Supplier. Termination under this clause shall be without prejudice to any other rights of the Contracting Authority.

A3-7 The Contracting Authority or UK SBS acting as an agent on behalf of the Contracting Authority shall at any time have the right for convenience to terminate the Contract or reduce the quantity of Services to be provided by the Supplier in each case by giving to the Supplier reasonable written notice. During the period of notice the Contracting Authority may direct the Supplier to perform all or any of the work under the Contract. Where the Contracting Authority has invoked either of these rights, the Supplier may claim reasonable costs necessarily and properly incurred by him as a result of the termination or reduction, excluding loss of profit, provided that the claim shall not exceed the total cost of the Contract. The Supplier shall have a duty to mitigate its costs and shall on request provide proof of expenditure for any compensation claimed

- B1-4 The Contracting Authority's rights under the Contract are without prejudice to and in addition to the statutory terms implied in favour of the Contracting Authority under the Sale of Goods Act 1979, the Supply of Goods and Services Act 1982 and any other applicable legislation as amended.

Payment shall be made to the bank account nominated in writing by the Supplier unless the Contracting Authority agrees in writing to another payment method.

- B4-10-2 any invoices for payment submitted by the subcontract or are considered and verified by the Supplier in a timely fashion and that undue delay in doing so is not to be sufficient justification for failing to regard an invoice as valid and undisputed;
; and
- B4-10-3 any subcontractor will include, in any subcontract which it in turn awards, suitable provisions to impose, as between the parties to that subcontract, requirements to the same effect as those imposed in paragraphs B4-10-1, B4-10-2 and B4-10-3 of this Clause B4-10, subject to suitable amendment to reflect the identities of the relevant parties.

For the avoidance of doubt, in any situations that the Contracting Authority is making payments to the Supplier without being presented with an invoice, the absence of an invoice does not waive any obligation regarding payments made by the Supplier to its subcontractors or supply chain.

- B6-2 Save as otherwise provided in the Special Conditions, the Supplier assigns to the Contracting Authority, with full title guarantee and free from all third-party rights, all Intellectual Property Rights in the products of the Services, including for the avoidance of doubt the Deliverables. Where those products or Deliverables incorporate any Intellectual Property Rights owned by or licensed to the Supplier which are not assigned under this clause, the Supplier grants to the Contracting Authority a worldwide, irrevocable, royalty-free, transferable licence, with the right to grant sub-licences, under those Intellectual Property Rights to maintain, repair, adapt, copy and use those products and Deliverables for any purpose.
- B6-3 The Supplier shall obtain waivers of all moral rights in the products, including for the avoidance of doubt the Deliverables, of the Services to which any individual is now or may be at any future time entitled under Chapter IV of Part I of the Copyright Designs and Patents Act 1988 or any similar provisions of law in any jurisdiction.
- B6-4 The Supplier shall, promptly at the request of the Contracting Authority or UK SBS acting as an agent on behalf of the Contracting Authority, do (or procure to be done) all such further acts and things and the execution of all such other documents as the Contracting Authority or UK SBS acting as an agent on behalf of the Contracting Authority may from time to time require for the purpose of securing for the Contracting Authority the full benefit of the Contract, including all right, title and interest in and to the Intellectual Property Rights assigned to the Contracting Authority in accordance with clause B6-2.

- B7-1-2 any claim brought against the Contracting Authority or UK SBS acting as an agent on behalf of the Contracting Authority for actual or alleged infringement of a third party's Intellectual Property Rights arising out of, or in connection with, the receipt, use or supply of the Services; and

B7-1-3 Any claim whether in tort, contract, statutory or otherwise, demands, actions, proceedings and any awards arising from a breach by the Supplier of clause B1-7 of these Conditions.

B8-3 The Supplier shall ensure that any subcontractors also maintain adequate insurance having regard to the obligations under the Contract which they are contracted to fulfil.

B8-4 The Supplier shall:

B8-4-1 do nothing to invalidate any insurance policy or to prejudice the Contracting Authority's entitlement under it; and

B8-4-2 Notify the Contracting Authority if any policy is (or will be) cancelled or its terms are (or will be) subject to any material change.

B8-5 The Supplier's liabilities under the Contract shall not be deemed to be released or limited by the Supplier taking out the insurance policies referred to in clause B8-1.

B8-6 If the Supplier fails or is unable to maintain insurance in accordance with clause B8-1, the Contracting Authority or UK SBS acting as an agent on behalf of the Contracting Authority may, so far as it is able, purchase such alternative insurance cover as it deems to be reasonably necessary and shall be entitled to recover all reasonable costs and expenses it incurs in doing so from the Supplier.

B9 Liability

Description	Details
Subject matter of the processing	<ul style="list-style-type: none"> • BEIS is commissioning a Behavioural Insights Research Project to develop understanding of the niche group of consumers eligible for funding through the Homes Upgrade Grant (HUG) scheme. • A supplier working on behalf of BEIS will use social research methods to collect, record and analyse data provided by a sample of HUG-eligible consumers, and will produce a report to present key research findings. • Data and findings from this research will be used internally within BEIS to help inform the HUG scheme design and the design of related grant schemes. <p>The processing of names and business contact details of staff of both Contracting Authority and Contractor will be necessary to deliver the services exchanged during the course of the Contract, and to undertake Contract and performance management.</p> <p>The Contract itself will include the names and business contact details of staff of both the Contracting Authority and the Contractor involved in managing the Contract.</p> <p>The Supplier will need to confirm that they are UK GDPR or GDPR (if operating in the</p>

	EEA) compliant when submitting a bid. The contractor will provide interviewees with a privacy notice before participating to ensure they understand the nature of the research, how their data will be used and stored.
Duration of the processing	<ul style="list-style-type: none"> • The contract start date is Monday 20th September 2021 and the end date is Friday 12th November 2021. • The data will primarily be used to feed into policy design ahead of submitting the HUG Outline Business Case in November 2021, but may also be used to support future iterations of HUG in years ahead.
Nature and purposes of the processing	<ul style="list-style-type: none"> • Nature of processing: Collection, recording, organisation, structuring and storage of data by the supplier (allocated to the project through the Behavioural Insights Framework). • Data collection methods could include interviews, workshops, focus groups, and/or the use of behavioural change models/frameworks but may include alternative approaches that the supplier suggests are more suitable. • A final report will be produced using the data, that includes practical recommendations on how the policy can be best designed and delivered to overcome the barriers to scheme access that may be experienced by consumers eligible for HUG, and also should mitigate any negative impacts on vulnerable groups and protected characteristics. • Purposes of processing: The research findings will help influence policy and delivery model design to make the policy as effective as possible at encouraging scheme uptake across the small eligible pool of consumers, which will be vital for the deliverability of the scheme. We would also use the research to identify issues arising around protected characteristics and ensure these are not discriminated against. As well as

	<p>informing policy design, this may help to inform a key aspect of any future impact assessment and help us to demonstrate that we are complying with the Public Sector Equality Duty when we launch the policy.</p> <ul style="list-style-type: none"> ○ The data collected through the BI Research Project will only be used internally within BEIS to inform grant scheme design • A presentation on the findings should be given soon after the report to allow BEIS colleagues to ask questions and seek clarification. • Along with weekly progress meetings, we would want a larger interim meeting with all relevant stakeholders after the behavioural insights work is complete to inform the next stages of the research and steer the behavioural barriers research. <p>The nature of processing will include the storage and use of names and business contact details of staff of both the Contracting Authority and the Supplier as necessary to deliver the services and to undertake the Contract and performance management. The Contract itself will include the names and business contact details of staff of both the Contracting Authority and the Supplier involved in managing the Contract.</p>
Type of Personal Data	<ul style="list-style-type: none"> • Whilst the supplier will ensure a good spread of end-users, including geography, age, those on benefits, and those working but on low income, we do not need to hold specific information on each person. • We do not need names, NI numbers, telephone numbers, images, biometric data etc • Some personal data on household income, benefits, geographical location, age and relevant health vulnerabilities of data subjects and/or members of their households will be processed by the contractor on behalf of BEIS. <p>The nature of processing will include the storage and use of names and business contact details of staff of both the</p>

	Contracting Authority and the Supplier as necessary to deliver the services and to undertake the Contract and performance management. The Contract itself will include the names and business contact details of staff of both the Contracting Authority and the Supplier involved in managing the Contract.
Categories of Data Subject	<ul style="list-style-type: none"> The sampled participants should meet the HUG criteria of low income (household income below £30,000), living in EPC D-G, owner occupier or private rented sector off-gas grid homes. Within the study, participants should be segmented into the following groups: <ul style="list-style-type: none"> (a) consumers on benefits; (b) consumers on low income but not on benefits; (c) landlords of low income tenants eligible for HUG funding; and (d) an appropriate split of demographics within the HUG-eligible population (taking into account gender, age groups, ethnicity, urban/rural, region and those with health needs). There should also be an even split between participants who live in homes heated by electricity and homes heated by carbon intensive fossil fuels, such as oil, coal, and liquid petroleum gas. <p>Staff of the Contracting Authority and the Supplier, including where those employees are named within the Contract itself or involved within the Contract management.</p>
Plan for return and destruction of the data once the processing is complete UNLESS requirement under union or member state law to preserve that type of data	<p>BEIS will have the Personal Data from this research deleted.</p> <p>Personal Data will be erased from any computers, storage devices and storage media that are to be retained by the Supplier after the expiry of the Contract (November 2021) and Supplier's retention period of 12 months (November 2022). The Supplier will certify to the Contracting Authority that</p>

	<p>it has completed such deletion no later than 30 November 2022.</p> <p>Where Personal Data is contained within the Contract documentation, this will be retained in line with the Department's privacy notice found within the Procurement Documents.</p>
--	---

The nature of the service will require the Supplier to collect personal data directly from data subjects. The Supplier will use the agreed Contracting Authority privacy notice as instructed by the Contracting Authority.

The Contracting Authority will be relying on consent as the relevant legal basis of processing. The Supplier will ensure that all communications requesting the provision on personal data allow for the data subject to provide clear, affirmative, informed, freely given and unambiguous consent, which requires a positive 'opt-in.' The Supplier will have mechanisms in place to ensure that consent is recorded and shown through an audit trail.

2. Cyber Security

In line with HM Government's Cyber Essentials Scheme, the Supplier will hold valid Cyber Essentials certification by the time of contract award. Evidence of the certification must be provided to the Contracting Authority in order for the contract to be awarded.

Evidence of renewal of certification must then be provided to the Contracting Authority on each anniversary of the first applicable certificate obtained by the Supplier for the duration of the Contract. In the event the Supplier fails to comply, the Contracting Authority reserves the right to terminate the Contract for material breach in line with the Standard Terms and Conditions of Contract.

If the Supplier already holds ISO27001 accreditation (or equivalent), no further Cyber Essentials certification will be necessary provided that the certification body carrying out this verification is approved to issue a Cyber Essentials certificate by one of the accreditation bodies.

3. GDPR Questionnaire

The Supplier agrees that during any term or extension it shall complete and return the attached questionnaire as advised below.

Note: The Contracting Authority also reserves the right to amend or increase these frequencies, as it deems necessary to secure assurance with regards to compliance.

The Contracting Authority requires such interim assurances to ensure that the Supplier is still compliant with the needs of the GDPR Act due to the implications of a breach.

The Supplier shall complete and return the questionnaire to the contact named in the Contract on the following date(s) from the Start Date of the Contract.

(01/03/2021)

UK Shared Business Services (UK SBS) on behalf of The Department for Business, Energy and Industrial Strategy (BEIS) invites you to submit a quotation for the services as outlined below.

Requirement

Please see below full details of our requirement:

The Home Upgrade Grant (HUG) is a £2.5 billion manifesto commitment that aims to provide energy efficiency upgrades and low-carbon heating to low-income households living in the least energy-efficient off-gas homes¹ in England, to tackle fuel poverty and meet net zero. An initial £150 million was allocated to HUG in Spending Review 2020. This funding is being delivered via local authorities, commencing in early 2022 and delivering to March 2023, and is being allocated to local authorities as part of the Sustainable Warmth competition alongside Phase 3 of the Local Authority Delivery scheme. Future multi-year funding for HUG is subject to future fiscal events.

For the £150 million HUG scheme, the grants available will be between £10,000 and £25,000 depending on homes' starting EPC bands and starting heating fuel types. Eligible owner-occupier households will receive a 100% grant for the cost of eligible upgrades. Landlords of eligible tenants, however, will need to make a financial contribution to the cost of upgrades of at least one third, with the remaining costs provided by HUG. Upgrades made through HUG will typically include 'fabric first' measures (insulation and draught-proofing) in combination with heat pump installations to make homes thermally efficient and suitable for our net zero future.

Using fuel poverty statistics, BEIS statisticians estimate there are around 800,000 homes that meet the HUG criteria of: low-income, EPC D-G, owner-occupied or privately rented, in England, and off-gas grid. Around half of these homes are heated with electric heating, and the other half with fossil fuel heating (such as oil, coal, or liquid petroleum gas). Those homes heated with fossil fuels will be the target of forthcoming off-gas grid regulations to mandate the replacement of fossil fuel boilers with low-carbon alternatives from 2026. The HUG scheme will therefore serve as an **enabler for those heat regulations, priming the supply chain and ensuring a higher number of low-income households receive the support they need to transition to clean heat to meet the new requirements, which they would otherwise not be able**

¹ Homes that are off the gas grid and have energy efficiency ratings of D to G on their Energy Performance Certificates (EPCs).

to afford. For the HUG scheme to achieve its target of upgrading 250,000 homes, it would need approximately 30% of households in the eligible pool to sign up to the scheme; this will be challenging (for context, the Energy Company Obligation has a roughly 10% conversion rate of approached households). We are therefore interested in key barriers to scheme uptake (particularly low-carbon heating uptake), and how our policy might be refined to overcome these barriers.

Research has already been conducted on the key barriers to heat pump uptake. Examples include:

- 'Green Homes Grant Vouchers Campaign Evaluation', Kantar.
- 'Evaluation of the Reformed Renewable Heat Incentive', CAG Consultants.
- 'Electrification of Heat Demonstration Project Evaluation', BEIS Clean Heat, E.ON, Ovo Energy, Warmworks.
- On-the-ground data obtained from Phase 1a and 1b of the Local Authority Delivery scheme, supplied by E.ON.

The above findings have given us insights on the key barriers to heat pump uptake, which include:

- Significant additional hassle compared to like-for-like replacement.
- Substantial additional steps for many households such as energy efficiency upgrades to get homes 'heat pump ready'.
- Unfamiliarity and uncertainty about low-carbon heating technologies.
- Maintenance, high replacement costs further down the line, and in certain circumstances higher running costs.
- Potential perceived risks around noise, inadequate performance or aesthetics, and issues around finding suitable locations on buildings for air source heat pumps.

However, there remain key evidence gaps and unanswered research questions. In particular, the above research papers do not focus exclusively (or, in certain cases, at all) on off-gas homes or low-income households. For example: the Renewable Heat Incentive is for able-to-pay customers, not low income; the Green Homes Grant Vouchers and Local Authority Delivery Schemes are open to both on- and off-grid homes; and the Green Homes Grant vouchers scheme is open to both low-income and able-to-pay customers; all of which makes these findings less applicable to our niche scheme. Furthermore, none of the above research papers examine the impact of the forthcoming heat regulations, which is a pivotal knowledge gap for our scheme.

The key evidence gaps and research questions that remain to be answered include the following:

Barriers

- a) Provide a comprehensive outline of the barriers to the uptake of energy efficiency measures and heat pumps among eligible households (low-income, EPC D-G, owner-occupied or privately rented, off-gas, and in England). This should include:
- A deeper analysis of already-identified barriers, specific to the group of consumers under consideration.
 - Identification of other barriers for this group regarding uptake of these measures and the scheme as currently proposed.

Drivers

- b) What are the main drivers and motivations that influence HUG eligible consumers to decide to upgrade their home with energy efficiency measures and/or low-carbon heating?
- c) Which of the measures available through HUG do our specific group of consumers have the most appetite to install and why?

Role of regulation

- d) How might the introduction of proposed regulation (such as the possible introduction of future off-gas grid regulations to mandate the replacement of fossil fuel boilers with low-carbon alternatives, and the updated Minimum Energy Efficiency Standards preventing landlords from renting homes that have energy efficiency ratings of D-G) affect the uptake of the Home Upgrade Grant? In particular, how might it affect consumers and landlords reluctant to take up

the scheme in its current form?

Other

e) Would consumers living in oil heated homes be willing to accept 100% grants for low-carbon heating upgrades if it led to similar or slightly higher energy bills in the short term, but potentially lower energy bills after 3 to 5 years?

Expected acceptance rate *(if budget- and time-constraints allow, we would like to add this small quantitative element to the research)*

f) What proportion of eligible owner occupier consumers would be willing to accept 100% grants for energy efficiency *and* low-carbon heating upgrades?

g) What proportion of landlords of eligible tenants would be willing to accept a two-thirds grant towards energy efficiency *and* low-carbon heating upgrades?

As part of the policy design and development process ahead of submitting our Outline Business Case (OBC) and our Invitation to Tender (ITT) for the HUG scheme, we wish to develop our understanding of the niche group of consumers who are eligible for HUG funding by commissioning behavioural insights research. In particular, we wish to identify key barriers that may prevent eligible consumers from accessing HUG, and to understand how low-carbon heating systems (heat pumps in particular) are perceived by individuals within this group, and whether possible future MEES and off-gas grid regulations may help to override any reluctance of owner occupier consumers and landlords of eligible tenants to accept a Home Upgrade Grant. These are new research parameters and questions that have not been answered by previous studies, including those research papers listed above.

As HUG is a grant scheme for fuel-poor and low-income households (many of whom are vulnerable), we also wish for this research to identify issues surrounding vulnerable groups. This may include households with a member who is more susceptible to living in a cold home due to respiratory, circulatory, or mobility issues, or due to them being a vulnerable age of either under 5 or over 65 years old.

The outcome of this research will help influence policy and delivery model design to make the policy as effective as possible at encouraging scheme uptake across the small eligible pool of consumers, which will be vital for the deliverability of the scheme. We would also use the research to identify issues arising around protected characteristics and ensure these are not discriminated against. As well as informing policy design, this may help to inform a key aspect of any future impact assessment and help us to demonstrate that we are complying with the Public Sector Equality Duty when we launch the policy.

We would like to identify key drivers of and barriers to scheme uptake, with the objective of maximising the number of eligible households choosing to access and engage with HUG. Once the behavioural barriers to scheme uptake have been identified, this project should use behavioural insights to inform alterations to the policy design and delivery approach to help mitigate those barriers and result in greater scheme uptake, ultimately increasing scheme deliverability and enabling greater progress towards the government's fuel poverty and net zero targets.

We would like to commission a behavioural insights research project to address the following research questions:

- What are some of the major theoretical drivers of, and barriers to, HUG uptake for households and landlords that are in-scope for the scheme?
- What do these households and landlords understand about low-carbon heating technology in general, and heat pumps specifically? Prompted and unprompted.
- What are the attitudes of these households and landlords towards low-carbon heating technology in general, and heat pumps specifically? What do they see as the most significant advantages and disadvantages?
- Of those who would be reluctant to accept a HUG grant, would this change if potential future MEES or off-gas grid regulations came into effect?

Within the study, participants should be segmented into the following groups:

A. HUG-eligible participants (household income below £30,000; living in EPC D-G, owner-occupied or private-

rented, off-gas homes).

- These participants should be split into (1) those on means-tested benefits and (2) those not on means-tested benefits.
- They should also be split into those who live in homes heated by (1) electricity and (2) carbon-intensive fossil fuels (such as oil, coal, and liquid petroleum gas).
- These participants should also have an appropriate split of demographics (gender, age, ethnicity, urban-rural, region, and those with health needs).

B. Landlords of HUG-eligible tenants.

We recognise it may be challenging to find landlords of low-income tenants. If necessary, the supplier can collect the views of any landlord of an off-gas home with an EPC rating of band D to G, so long as the landlord is given the hypothetical scenario of having a low income household in the property.

Participant characteristics	Electric heating	High-Carbon heating
Owner-occupier - benefits	4	4
Renting - benefits	4	4
Owner-occupier - no benefits	4	4
Renting - no benefits	4	4
Landlord	5	5

We consider either depth interviews (of at least 30 mins) and focus groups (of around one hour) to be the most appropriate fieldwork methods for this qualitative research. We welcome alternative suggestions from the supplier that may be more suitable. The supplier should specify whether these interviews or focus groups would occur digitally, over the phone, in-person, or a mix. We would expect the total sample size for this project to be at least 40 participants to ensure coverage across our required segmentation. We are open to steers from the supplier about the sample size that should be used for this research. The supplier will need to specify the sample frame they will employ for this research project, for example:

The supplier would then systematically analyse the gathered qualitative evidence using an appropriate and specified method (such as framework analysis), and synthesise findings within sub-themes of the above research questions.

The final report (suitable for both a policy-making audience and the public) should answer the above research questions, and include practical ideas and evidence-based recommendations on how the policy can best be designed to overcome the potential barriers to scheme uptake and engagement, using behavioural models and insights. It should also highlight any unintended behavioural consequences of the policy that have been identified (particularly for vulnerable groups or protected characteristics) and provide suggestions on how these could be avoided/mitigated. The report should use a standard BEIS reporting template, and detailed expectations for report structure and length will be agreed with the project team during delivery. We typically expect reports to be up to 30 pages in length, including an executive summary of up to 3 pages in length.
