BEIS will carry out assessments and testing to determine the current levels of compliance in the freezer and fridge freezer sectors in the UK in line with Product Safety requirements.

Tenders are invited for testing according to the requirements detailed below.

2. Requirements

To test 10 critical clauses from EN 60335-1 and the relevant part 2 covering electrical and fire hazards for a selection of freezers and fridge freezers to verify compliance with the following Regulations (and any amendments to these):

- General Product Safety Directive (GPSD) – 2001/95/EC
- UK Statutory Instrument 2005 No. 1803 – Consumer Protection The General Product Safety Regulations 2005

The test methods applied should follow harmonised standards EN 60335-1:2012 and EN 60335-2-24 (freezers and fridge freezers) published in the Official Journal of the European Union, or other reliable, accurate and reproducible calculation and measurement methods, which take into account the generally recognised state of the art.

The critical clauses, which we required testing for, are:

- 30 Resistance to heat and fire
- 19 Abnormal operation
- 11 Heating
- 22 Construction
- 8 Protection against access to live parts
- 23 Internal wiring
- 24 Components
- 25 Supply connection and external flexible cords
- 28 Screws and connections

- 27 Provision for earthing

3. Test Reports

In addition to any requirements/format described in relevant testing standards, the following BEIS specific content shall apply:

- Test reports should be generated for each individual unit subjected to testing, in a format which is suitable for use in a UK court.
- It is a requirement that, in addition to the technical test reports, expert witness statements in the correct form, producing any test reports generated or other documents or materials as exhibits are completed and signed. In addition, these witness statements must include a summary of test findings identifying specific non-compliance.
- The reports may be presented to persons with limited technical knowledge, so a clear and concise summary of the findings and the test results should be provided. Each report should therefore include a separate 'plain English' summary page containing the following data (for every regulation requirement tested):
 - Test result
 - Tolerances (if applicable)
 - Statement of compliance/non-compliance with the requirements
 - Exact details of any non-compliance with relevant standards and legislation?
- There should be an additional separate report, collating the summary sheets from all the individual test reports. The data should be presented so as to allow easy comparison of results between the tested samples.
- It is imperative that correct evidence handling processes and procedures must be followed and this together with the continuity of chain of evidence must be fully documented and evidenced, together with the test reports and expert witness statements. This chain of custody record must include the chronological documenting and recording each of the stages involved in the acquisition, custody, control, transfer, testing and presentation signed, timed and dated at each transfer of evidence for admissible production of physical evidence at any court proceedings. The chain of custody must also include details and evidence of secure storage and transportation.
- If further testing is required, we will also require full summaries of all the tests to enable potential enforcement action.

4. Sample Details

A total of 3 units will be tasted - freezer (1 – 120L) and fridge freezer (2 – 251L). All three units contain flammable refrigerant.

A definitive list of sample products may not be available before the deadline date for receipt of bids. If a difference in pricing is envisaged for any specific type of appliance, please state this in the quotation.

Following testing, if a product does not meet the requirements set out in the verification procedures of the Regulation, further testing may be required by the successful bidder, however this invitation to tender is only seeking bids for the initial sample of 3 products.

2) PROJ1.2 - Evidential Handling

Intertek understand that the results of testing may be used as part of a criminal investigation therefore evidential traceability of the test samples are of the utmost importance.

Intertek operate a secure site with key fob access to all areas, security camera's keep the building under 24-hour surveillance. Secure private car park with key fob access out of normal business hours. Gated access to the stores area from the road which is locked outside of normal business hours. Key fob access to the stores area from within the building is limited to those personal who are responsible for handling samples. Intertek MK has a bonded warehouse on site allowing for extra securar storage of samples when not being tested. The Freezer and Fridge samples will be stored in our bonded warehouse.

Intertek confirm that all records relating to evidential traceability will be retained until the conclusion of any court case. This includes but not limited to goods in record of each sample, receipt of samples, storages of samples, record of the movement of each sample from bonded warehouse to safety test laboratory. Samples not being tested will be locked in our bonded stores.

Only Intertek appointed test engineers and the laboratory manager will have access to the test samples. The retrieval and storage of samples from the bonded warehouse to the safety test lab will be recorded at all times.

3) PROJ1.3 - Transportation

Intertek guarantees a dedicated transportation of the test samples, where no other goods are transported in the vehicle, and that it is locked and sealed for the whole journey.

Intertek works closely with a dedicated transport company. They worked with Intertek on high profile projects/tenders for the ministry of defence, European governmental agencies and consortium organisations.

The drivers assigned are and will be made aware of the fact he/she may be required to provide a witness statement and possibly give evidence in a court of law.

We select the driver prior to assigning the project. All the drivers we use speak fluent English and are trained in the process of recording any incident where the vehicle is opened for inspection or the seal broken for any other reason.

We will take all the necessary steps to ensure that the samples will be transported to and from BEIS without any damage occurring.

We undertake that if the seal is broken for any reason, this will be documented along with any relevant information (why the seal was broken, if it was witnessed, any damage to the samples etc.) by the driver and a new seal applied. Any documentation provided to the driver by authorities (customs/police etc.) must be retained and produced for us.

If the vehicle is opened for any reason, we will inform BEIS as soon as is practicably possible.
